CAREER OBJECTIVE

Motivated and detail-oriented Java Full Stack Developer with hands-on experience building end-to-end web applications using Java, Spring Boot, Hibernate, MySQL, and React. Skilled in designing RESTful APIs, implementing secure authentication, and building responsive, user-friendly front-end interfaces with HTML, CSS, JavaScript, and ReactJS. Completed an industry-oriented Java Full Stack Development program and delivered a fully functional e-commerce application from concept to deployment. Looking to join a dynamic engineering team as a Java Full Stack Developer to build scalable, high-quality software and grow as a well-rounded software engineer.

TECHNICAL SKILLS

Programming Languages: Java (Core Java, OOPs, Collections, Multithreading, Exception Handling), SQL

Front-End Development: HTML5, CSS3, JavaScript (ES6+), ReactJS, Responsive UI Design

Back-End Development: Spring, Spring Boot, Hibernate, JDBC, RESTful API Design and Development

Database: MySQL (Schema Design, Queries, Joins, CRUD Operations)

Core CS Fundamentals: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOPs)

Tools and Concepts: Git and GitHub, Postman, SDLC, Agile Methodology Basics, Full Stack Application Architecture

KEY STRENGTHS

Quick Learner, Strong Problem-Solving and Analytical Thinking, Team Collaboration, Effective Communication, Ownership and Accountability, Adaptability to New Technologies

PROJECTS

SalesSavvy - E-Commerce Website (Java Full Stack Project)

Tech Stack: Java, Spring Boot, Hibernate, MySQL, HTML, CSS, JavaScript, ReactJS

- Designed and developed a full-featured e-commerce website end-to-end, covering both the Spring Boot back-end and the ReactJS front-end, allowing users to browse products, view details, and manage their accounts seamlessly.
- Built secure user registration, login, and authentication functionality to protect user data and control access to the platform.
- Architected and implemented RESTful APIs in Spring Boot to handle product catalog, user, and order-related business logic.
- Designed relational database schemas in MySQL to efficiently store and manage user, product, and order information.
- Integrated the ReactJS front-end with back-end REST APIs to enable dynamic, real-time browsing and account management, delivering a smooth, responsive user experience across the e-commerce website.
- Followed full stack development best practices, including modular code structure, clean UI design, and RESTful architecture, to build a scalable and maintainable web application.

CERTIFICATIONS

- Java Full Stack Development Program - KodNest (Completed): In-depth training covering Java, JDBC, SQL, HTML, CSS, JavaScript, ReactJS, OOPs, Collections, and Spring Boot, culminating in the development of a real-world full stack e-commerce project.

EDUCATION

B.Tech in Computer Science and Engineering

Roland Institute of Technology, Odisha | CGPA: 8.0 | 2026

DECLARATION

I hereby declare that the above information is true and accurate to the best of my knowledge.
